Collaboration on Second Education with Patheya Foundation

It gives me immense pleasure to announce that the Ratan Tata Maharashtra State Skills University (RT-MSSU) is embarking on a significant collaboration with the Patheya Foundation. This partnership will introduce an innovative initiative aimed at imparting Second Education to our students.

In alignment with the National Education Policy's emphasis on the Indian Knowledge System (IKS), RT-MSSU has been a pioneer in integrating IKS into our curriculum and has established a dedicated Chair for IKS. This collaboration will enhance our commitment to developing students' critical thinking skills and promoting experiential learning, equipping them with the knowledge and tools needed for self-understanding through scientific inquiry.

While modern science has made remarkable advances in exploring the objective universe, the understanding of our inner selves remains a profound challenge. Our ancient Seers have provided invaluable insights into this area, which will serve as a foundation for our Second Education initiative. By focusing on these ancient teachings, we aim to foster holistic personality development among our students.

Starting with the 2024-25 academic session, we will offer courses on Second Education to students who wish to enroll. As we evolve, our goal is to extend this opportunity to all students, regardless of their areas of study. Together with the Patheya Foundation, we are committed to this solemn mission of empowering students to realize their true potential, thereby transforming their lives and strengthening the skilling ecosystem in our institution.

This initiative represents a significant step towards nurturing well-rounded individuals equipped with the skills necessary for both personal and professional success.
